

Declaration of Universal Interdependence

4th of July, 2024

Jessure Healing

Preamble

When in the course of human events, it becomes necessary for the people of the world to transcend the limitations of self-interest and division, and to embrace a higher state of universal consciousness, it is incumbent on all atoms of Source to declare the causes which compel us to this transformation.

Principles of Universal Empowerment

We hold these truths to be self-evident, that all atoms of Source, animate or inanimate, sentient or otherwise, are endowed with the inalienable rights to experience themselves as eternal souls connected to Source in universal consciousness.

That through their individual expression of passion and purpose, they contribute to universal consciousness in order to perpetuate joy, love, abundance, freedom, health, success, security, companionship, creativity, peace, life, wholeness, beauty, enthusiasm, contentment, spirituality, enlightenment, confidence, empowerment, sincerity, integrity, imagination, and kindness.

This is because the primary purpose of Life in its broadest sense is to expand universal consciousness; and in synergy with this, the primary purpose of individual life is to pursue one's passion and purpose in a way that uplifts all of humanity in service to the collective.

Grievances

The present state of humanity is a history replete with repeated injuries and usurpations, all of which individually and collectively are an assault on the empowerment of individuals and an affront to the universal empowerment of all atoms of Source. To prove this, let these facts be submitted to candid scrutiny.

1. Autocrats, dictators, and power mongers oppress, control, and limit the freedom and potential of individuals and communities.
2. Self-interest and greed prioritize personal gain over the well-being of others and the planet.
3. War and conflict destroy lives, displace communities, and create long-lasting suffering and trauma.
4. Hunger and poverty deprive individuals of basic needs in a world of abundant resources.
5. Lack of free abundant energy suppresses the potential of billions and creates lack, need, and want, holding humanity in a lower state of consciousness.
6. Corrupt institutions engage in abuse of power and perpetuate systems that benefit a few at the expense of the many.

7. Failed governance systems do not represent the interests of the people or protect their rights.
8. Economic systems focused on profit over purpose promote morally corrupt behavior and misconduct for financial gain.
9. Secret agendas undermine transparency, trust, and democratic processes.
10. Inequality and injustice create divisions and suffering through racial, gender, economic, and social disparities.
11. Extremism and hate-fueled violence disrupt peace and harmony through acts of terrorism and violence.
12. Overpopulation strains resources and ecosystems and exacerbates population issues due to lack of family planning and education.
13. Environmental degradation destroys natural habitats and biodiversity through pollution, deforestation, and exploitation.
14. Insertion of man-made religions in public office taints public policy and governance, locking into the consciousness of the collective a corrupted notion of Source and universal law.
15. Suppression of self-regulated free speech interrupts the natural flow of energy and censors the expression of creativity and innovation, which are the natural preconditions for the evolution of higher consciousness.
16. Economic exploitation dehumanizes workers and violates their rights through exploitative labor practices.
17. Educational inequality limits opportunities for many through disparities in access to quality education.
18. Health disparities create inequitable access to healthcare services and resources.
19. Technological oppression infringes on privacy and civil liberties through surveillance technologies.
20. Cultural homogenization erodes cultural diversity and indigenous traditions through globalization and cultural imperialism.
21. Mental health crisis is neglected in societal structures, leading to stigma and lack of support for individuals facing mental health challenges.
22. Misuse of science and technology develops and deploys technologies without ethical considerations and for harmful purposes.
23. Corporate influence in politics gives undue influence to corporate interests in political decision-making.
24. Agricultural practices harm the environment and human health through industrial farming and monopolization of seeds and resources.
25. Water scarcity and pollution contaminate and deplete water resources critical for life.
26. Displacement and migration force people to move due to conflict, environmental disasters, and economic hardship without support or humane treatment.
27. Intellectual property monopolies restrict access to knowledge and innovations through strict intellectual property laws.
28. Violence against women and children is prevalent through domestic violence, trafficking, and exploitation without protection or support for victims.

29. Apathy and indifference towards global issues and the suffering of others lead to failure to act collectively for the common good.
30. Loss of community and connection breaks down community bonds and social connections in modern society, leading to isolation and loneliness.
31. Incursion into private lives by governments and legal systems violates the fundamental human right to universal empowerment and autonomy over personal freedoms, such as limiting women's reproductive rights.
32. Lack of quality affordable housing deprives many individuals and families of safe and secure living conditions, thereby impeding their ability to thrive and contribute to universal empowerment.
33. Unfettered development and abuse of artificial intelligence prioritize profit and control over ethical considerations, infringing on privacy, autonomy, and the dignity of individuals, and threatening the balance of universal empowerment.
34. The inability of laws and constitutions to evolve and adapt to the needs of the times restricts the progress and well-being of individuals and societies, hindering their capacity to achieve universal empowerment and contribute to the collective growth of consciousness.
35. The media's role in perpetuating propaganda, lies, conspiracies, and tribalism manipulates public perception, fosters division and mistrust, and undermines the informed and enlightened state necessary for universal empowerment and collective harmony.

Declaration of Intent

We, therefore, being the representatives of humanity, and appealing to the supreme consciousness of the universe for the rectitude of our intentions, do, in the name and by authority of the enlightened people of this world, solemnly publish and declare that all beings are, and of right ought to be, free and interdependent entities, absolved from all forms of tyranny and oppression. That they are endowed with the power to pursue their passions and purpose, and to do all acts and things which interdependent and empowered beings may of right do in the service of advancing universal consciousness.

Vision for the Future

For the support of this declaration, with a firm reliance on the protection of universal consciousness, we mutually pledge to each other our lives, our fortunes, and our sacred honor. We envision a future where every being thrives in a state of universal empowerment, contributing to the expansion of universal consciousness through their unique expressions of passion and purpose, living in perpetual joy, love, abundance, freedom, health, success, security, companionship, creativity, peace, life, wholeness, beauty, enthusiasm, contentment, spirituality, enlightenment, confidence, empowerment, sincerity, integrity, imagination, and kindness.
